

Dear Parent,

Thankfully, there are many schooling options in our area. You have to find what suits you and your children best. We realize that Veritas may not be for everyone. For instance, Veritas is academically rigorous. We seek to introduce students to meaningful curriculum that will help students become good thinkers and communicators and that requires hard work on the part of both teachers and students.

In the Psalms, our children are compared to arrows in the hand of a warrior (Ps 127:4). At Veritas, we take the long view in training our students to be arrows that will fly straight and stay on target to accomplish the kingdom work that God has prepared for students to do.

The chart below is an attempt to provide some factors that we would encourage you to use as you consider the options that you have for the coming school year. How do your other options compare? How do these factors align to your long-term priorities for your children?

If Veritas seems like a place where you and your family could put down roots and grow in the rich soil of great curriculum, enthusiastic teachers, and an inviting school culture, we would love to partner with you in the education of your children. Visit our website at www.veritasalabama.com for more information or write us at info@veritasalabama.com if you have questions in deciding if Veritas is right for you.

Sincerely in Christ,

Jonathan Haynes
Headmaster
Veritas Classical School
Huntsville, Alabama
